

Sconce Solutions Moves Up to the Gold Level at PTC® PartnerAdvantage™ Program

Sconce Solutions Bingo! Connects to PTC's Pro/ENGINEER® and Windchill® software to enable users to easily perform 3D Geometric shape searches of their existing CAD and PLM Databases!

Singapore June 2nd, 2010 - Sconce Solutions Pte, Ltd., the developer of Bingo! 3D geometric shape search software, announced today that it has advanced to the Gold Tier at PTC's Partner Advantage™ Program.

Acceptance in the Partner Advantage™ Program arose from Bingo's unique 3D geometric search engine and ability to quickly and easily catalog parts by Shape Index, thus enabling easier retrieval of existing parts and enabling design data reuse.

According to Annamalai Meyyappan (Mey), CEO of Sconce Solutions, in Singapore, *"This marks an important step in our Company's expansion as a global software provider to product development companies using PTC software. Today companies are under tremendous pressure to minimize the product design cost/time, to enable designers to spend more time on design innovation instead of recreating already existing designs. We are proud to offer our solution to PTC clients and we are delighted to have continuous support from PTC."*

About – [Bingo!](#)

Driven by a unique, powerful and accurate shape identification engine, Bingo! enables the automatic part classification, efficient indexing based on shape, and fast similar-search on small to large library of 3D models. Bingo! is designed to be integrated as an essential tool for companies adopting Design Reuse. Design Reuse is extremely important and a survey shows that 30% to 40% of new parts designed either already exists or have similar parts that can be used as a base model to start.

About Sconce Solutions Pte, Ltd: (www.sconcesolutions.com) Sconce Solutions is a provider of engineering solutions and services in PLM, MCAD and offshore software development. Sconce has been in business since October, 2001. Sconce is a privately held company with
